GOLF COURSE & DRIVING RANGE NEWS

Our Golf Course Maintenance team has continued to make excellent progress with a number of infrastructure improvements across the course during June, all aimed at enhancing playability, improving drainage, and ensuring a better experience for our members and visitors.

Several key projects have now been completed, including significant drainage improvements to both greenside bunkers on the 10th hole. The cart path behind the 18th Green has also been fully repaired, while the turn point on the 15th Tee Box cart path has been restored to improve access and durability.

In addition, the drainage on the 1st hole has been successfully connected to the main drainage catchment system, providing more effective water management in this area.

Work continues on a number of important projects across the course. A new drainage pipe is currently being installed between the 9th and 18th holes to ensure the rough area in front of the 18th Blue and Red Tees remains dry throughout the season.

Repairs are also underway on the cart path in front of the 14th Tee, while a leaking irrigation valve between the 18th Green and behind the 10th Tee Box is being replaced. As part of this work, the cart path adjacent to the 18th Green is being widened to better accommodate traffic and reduce wear in this high-use area.

Our ongoing irrigation system upgrade also remains a priority, with improvements being made to enhance the efficiency and reliability of the system. These investments will help us maintain excellent course conditions while supporting the long-term sustainability of the golf course.

We thank all members for their patience and understanding while these essential improvements are carried out and look forward to everyone enjoying the benefits of these upgrades in the months ahead.
